AUTHOR	Beaver, Evelyn, Ed.; Kruckenburg, Joanna, Ed.
TITLE	Annual Report on Enrollment, Fall 1983. California Community Colleges.
INSTITUTION	California Community Colleges, Sacramento. Office of the Chancellor.
PUB DATE	Jun 85
NOTE	142p.; Report prepared by the Analytical Studies Unit. Document printed on colored paper and contains small print throughout.
PUB TYPE	Statistical Data (110) -- Guides - Non-Classroom Use (055)
EDRS PRICE	MF01/PC06 Plus Postage.
DESCRIPTORS	Annual Reports; *Community Colleges; Enrollment; Enrollment Rate; *Enrollment Trends; School Demography; State Surveys; *Student Characteristics; Two Year Colleges; *Two Year College Students
IDENTIFIERS	*California

ABSTRACT

Designed for both state- and district-level policy makers, this report profiles the demographic and academic characteristics of California community college students. Introductory remarks describe the database for the report, the report's format, and the data elements presented. Section I contains a series of tables which aggregrate the following student counts and characteristics by district: (1) number and percent of full-time, part-time and noncredit students; (2) gender and ethnicity; (3) age; (4) credit enrollment by credit unit workload attempted; and (5) weekly student contact hours for regularly scheduled credit classes and total potential hours of attendance for positive attendance classes. Section II is a parallel presentation for the individual colleges. In section III, district data related to gender and ethnicity, age, high school completion status, level of academic achievement, enrollment status, residency status, citizenship status, and student goals are categorized by full-time, part-time, and noncredit status. PREFACE

This is the first in a series of annual reports profiling California community college students. It is designed to provide state and district-level policy makers with information for planning and evaluation. Based on data collected for the Chancellor's Office Information System Student Data File, this report focuses on student demographic and educational characteristics.

We thank district personnel for their cooperation in timely and accurate submittal of student data to the Chancellor's Office. It is only through the diligent efforts of these staff that a report such as this is possible.

From the Analytical Studies Unit of the Chancellor's Office, Leonard Shymoniak analyzed the data and wrote the various computer programs that produced the summary tables. Evelyn Beaver and Joanna Kruckenburg edited the report and prepared it for publication. The data processing and maintenance functions were attended to by Kay Crabbe and Elizabeth Kamrar.

Since this is the first report of this kind, we are especially interested in learning now to make succeeding documents more helpful to users of student data. Please contact us at (916) 445-0102 with your suggestions and comments.

Chuck McIntyre
Director of Analytical Studies

June, 1985

INTRODUCTION

This first annual report profiles the demographic and academic characteristics of California community college students, providing a portrait for both state and district-level information users. While there is no "typical" community college student, this document seeks to describe the multi-faceted characteristics of these students to increase the readers' understanding of this diverse population.

The database for this report is the Student File of the Chancellor's Office Information System. This file is a census of the 1.2 million actively enrolled students as of the first attendance accounting period for each of the colleges in the 70 districts. This file is used for generation of reports required by federal and state-level government agencies along with a variety of policy analyses and planning efforts.

This report is divided into three sections, each consisting of a series of tables. Section I aggregates student counts and characteristics by district while Section II is a parallel presentation for colleges. In Section III, district data are categorized by full-time, part-time, and noncredit status (Element SE4).[1] Students are defined as full-time if they carry 12 units or more, and part-time if they attempt less than 12 units but more than 0 units. Students enrolled in zero credit units are labeled as noncredit. Students with missing data for the number of units attempted are included under noncredit. In all tables, unknowns for variables other than unit status are excluded for purposes of computing percentage distributions.

Each section presents gender, ethnicity and age. Sections I and II also make use of the elements: units attempted, weekly student contact hours (WSCH) and total potential hours of attendance (TPHA).

Age (Element SE1) is computed from the student's birthdate. The code for gender (Element S10) indicates whether the student is male, female, or unreported. Ethnicity is a code (Element S8) representing the student's racial or ethnic background. A student may be American Indian or Alaskan Native, Asian or Pacific Islander, Black, White, Hispanic, Filipino, Other (persons not fitting into any of the previous categories), or Non-respondent (the item is left blank).

The element, units attempted (Element SE7), is defined as the total number of units of credit generated by credit courses in which a student is actively enrolled as of the first census. The tables present the number and percentage of students enrolled in each credit unit group. Credit enrollment is a count of the total number of students taking one or more credit courses in that district or college. That is, students enrolled in both credit and noncredit classes are labelled 'credit' whereas exclusive enrollment in noncredit classes is labelled 'noncredit'.

---

[1] Refers to data element number in the Data Element Dictionary.

WSCH (Element S17) is the total number of hours which a student spends in class during the first census week. WSCH is reported only for those students who are actively enrolled in full-term census courses offered for credit. Total Potential Hours of Attendance (TPHA) (Element S14) is another measure of contact hours. TPHA is the product of active class enrollments and total scheduled course hours for credit and noncredit, noncensus attendance accounting classes.

Section III includes the use of five other variables. They are: type of high school education, student academic level, enrollment status, citizenship status, and student goal.

The type of high school education (Element S5) refers to the kind of diploma or certificate held by the student. The options include high school diploma, G.E.D., certificate of equivalency, certificate of California high school proficiency examination, certificate of completion, and foreign secondary school diploma or certificate of graduation. Additionally, the student may not be a high school graduate or the high school degree status may be unknown.

The student's level of academic achievement (Element S13) is determined by the number of credit units completed at an accredited institution prior to registration for the term. Enrollment status (Element S4) is a code which indicates the student's current standing at the reporting college. A new student may be a first-time student or a first-time transfer student. A student who has previously attended the reporting college may be a returning transfer student, a returning student, or a continuing student.

The citizenship status (Element S2) indicates whether or not the student is a United States citizen. If the student is not a citizen, then the kind of visa is noted. Visa types include immigrant, refugee, student, other, and unknown.

The student's goal (Element S12) is the educational aim of the student plus the amount of time necessary to achieve that objective. Students may be planning on transferring to another institution of higher education with or without a degree, or they may be aiming for the AA or AS degree in either general or vocational education. Other students may be pursuing a certificate or job skills.
